to me that they were distinctly less intelligent than the men. 153

The characteristic note in the demeanour of the people is given by their absolute belief in their own superiority over the surrounding races. They are grave and dignified, and yet thoroughly cheerful and well-disposed towards all. In their intercourse with Europeans, they now recognise the superior race so far as wealth and the command of physical and mental resources are concerned, but yet they are not in the slightest degree servile, and about many matters still believe that their ways are superior to ours, and, in spite of their natural politeness, could sometimes not refrain from showing their contempt for conduct which we are accustomed to look upon as an indication of a high level of morality. It is in the matter of ethical standards that the difference between the Todas and ourselves comes out most strongly. 157 181 829

The Village and the House

The Todas live in little villages scattered about the hills. The greater part of the plateau consists of grass-covered hills separated by valleys, sometimes narrow, more often of wide extent. In every valley there are streams and in many places swamps. In the hollows of the hills are small woods, generally known as sholas, and it is usually near these sholas that the Toda villages are to be found. Some parts of the hills are much more thickly beset with villages than others, and this is especially the case in the neighbourhood of the part known as Governor Shola, about six to eight miles west and north-west of Ootacamund. 133 311 361

In other parts one may go considerable distances without finding a Toda village, but relics of the former history of the Todas may be found widely scattered over the hills, and I think there can be little doubt that at one time the Toda habitations were much more generally distributed than they are at present. The bazaar at Ootacamund has now become an important place in the economic life of the Todas; they sell there the ghi or clarified butter in which form their dairy produce chiefly goes to the market, and they 361 437 443

1: Rivers E-5 (ca. 1901-02) 1906 Toda

361 procure in return at the bazaar the rice and grain and other
437 things which have now taken their places among the neces-
443 saries of life. In consequence there exists a tendency for the larger part of the Todas, especially those of the Todanad, to live within an easy distance of Ootacamund, and many of the villages in the more distant parts of the hills are now only occupied for a few weeks in the year.

104 The Toda name for a village is *mad*,[1] but this is now often
196 replaced by the Badaga form of the word, *mand*, and the
361 latter word is used exclusively by the Europeans and others
621 living on the Nilgiri hills. A *mad* usually consists of several huts. In some villages there may be only one hut, and the maximum number I have seen is six. At some places where there was formerly a village with dwelling-huts there is now only a dairy, but the term *mad* is still applied to the place at which the dairy is situated. The term *mad* is also given to the funeral-places of the Todas. Sometimes the funeral-place is also a village at which people live; sometimes it has only a dairy; while in other places there may be no trace of human habitations; but the term *mad* is equally applied in all three cases. The term is also used for the dairies and accessory buildings connected with the most sacred herds of buffaloes (the *ti*). Each group of buildings is called a *mad* or *ti mad*. The term has therefore a wider significance than "village" and denotes rather a "place"—a place connected in any way with the active life of the Todas. The chief village of a clan and certain other sacred or important villages are called *etudmad* and other villages are often known as *kinmad*.

343 A typical Toda village consists of a small group of huts
351 (*ars*), often on a piece of ground slightly raised above the
361 surrounding level and enclosed by a wall (*katu*). In this
417 wall there are two or three narrow openings, large enough to admit a man but not a buffalo. In most villages there is a dairy or there may be several dairies. Each of these buildings is also enclosed by a wall, usually higher than that surrounding the dwelling-huts. The dairies may be near the huts, but more commonly are at some little distance from

[1] The word *mart* is also occasionally used.

religion of this exceptionally interesting tribe, numbering, according to the latest census returns, 807 individuals, which inhabits the Nīlgiri plateau. I shall, therefore, content myself with recording the rambling notes made by myself during occasional visits to Ootacamund and Paikāra, supplemented by extracts from the book just referred to, and the writings of Harkness and other pioneers of the Nīlgiris.

The Todas maintain a large-horned race of semi-domesticated buffaloes, on whose milk and its products (butter and ney)* they still depend largely, though to a less extent than in bygone days before the establishment of the Ootacamund bazar, for existence. It has been said that "a Toda's worldly wealth is judged by the number of buffaloes he owns. Witness the story in connection with the recent visit to India of His Royal Highness the Prince of Wales. A clergyman, who has done mission work among the Todas, generally illustrates Bible tales through the medium of a magic-lantern. One chilly afternoon, the Todas declined to come out of their huts. Thinking they required humouring like children, the reverend gentleman threw on the screen a picture of the Prince of Wales, explaining the object of his tour, and, thinking to impress the Todas, added 'The Prince is exceedingly wealthy, and is bringing out a retinue of two hundred people.' 'Yes, yes,' said an old man, wagging his head sagely, 'but how many buffaloes is he bringing?"

The Todas lead for the most part a simple pastoral life. But I have met with more than one man who had served, or who was still serving Government in the modest capacity of a forest guard, and I have heard of

* Ney = ghi or clarified butter.

141

A thing of exceeding joy to the Todas was my Salter's hand-dynamometer, the fame of which spread from mand to mand, and which was circulated among the crowd at funerals. Great was the disgust of the assembled males, on a certain day, when the record of hand-grip for the morning (73 lbs.) was carried off by a big-boned female, who became the unlovely heroine of the moment. The largest English feminine hand-grip, recorded in my laboratory note-book, is only 66 lbs. One Toda man, of fine physique, not satisfied with his grip of 98 lbs., went into training, and fed himself up for a few days. Thus prepared, he returned to accomplish 103 lbs., the result of more skilful manipulation of the machine rather than of a liberal dietary of butter-milk.

123
141

The routine Toda dietary is said to be made up of the following articles, to which must be added strong drinks purchased at the toddy shops:—

262

(*a*) Rice boiled in whey.

(*b*) Rice and jaggery (crude sugar) boiled in water.

(*c*) Broth or curry made of vegetables purchased in the bazar, wild vegetables and pot-herbs, which, together with ground orchids, the Todas may often be seen rooting up with a sharp-pointed digging-stick on

[443]

* Average 73.

262 the hill-sides. The Todas scornfully deny the use of
[832] aphrodisiacs, but both men and women admit that they take sālep misri boiled in milk, to make them strong. Sālep misri is made from the tubers (testicles de chiens) of various species of *Eulophia* and *Habenaria* belonging to the natural order Orchideæ.

252 The indigenous edible plants and pot-herbs include
262 the following:—

(1) *Cnicus Wallichii* (thistle).—The roots and flower-stalks are stripped of their bark, and made into soup or curry.

(2) *Girardinia heterophylla* (Nīlgiri nettle).—The tender leafy shoots of vigorously growing plants are gathered, crushed by beating with a stick to destroy the stinging hairs, and made into soup or curry. The fibre
[824] of this plant, which is cultivated near the mands, is used
[994] for stitching the putkuli, with steel needles purchased in
[178] the bazar in lieu of the more primitive form. In the
[943] preparation of the fibre, the bark is thrown into a pot of boiling water, to which ashes have been added. After a few hours' boiling, the bark is taken out and the fibre extracted.

(3) Tender shoots of bamboos eaten in the form of curry.

(4) *Alternanthera sessilis.*
Stellaria media.
Amarantus spinosus.
Amarantus polygonoides.
} Pot-herbs.

262 The following list of plants, of which the fruits are eaten by the Todas, has been brought together by Mr. K. Rangachari:—

Eugenia Arnottiana.—The dark purple juice of the
[307] fruit of this tree is used by Toda women for painting
[386] beauty spots on their faces.

from the plains on the Tamilian side of the hills, either directly or through Kurumba middlemen. The details of these last transactions have been almost entirely forgotten through disuse. At the present time rice is obtained in the bazaars of Ootacamund and probably Kotagiri, chiefly from the Chettis, who also supply all the cloaks worn by the Todas and the waistcloths put on corpses at funerals, as well as many other articles. These articles are paid for chiefly with milk and ghee. While the milk of sacred buffaloes is too sacred to be thus profaned, the sanctity has been removed by the time it reaches the ghee-stage, and ghee may be sold, irrespective of its origin. The transactions with the Chettis are not allowed by them to be profitable to the Todas. If a Toda has only a few buffaloes, he is always in debt. And even a Toda with a fair number of buffaloes will usually be in debt. This starts during the dry season when the buffaloes give little milk and ghee is scarce. The Chetti is usually asked for credit and once this begins, the Toda can seldom free himself even if he suffers no accidental misfortune such as the death of a buffalo. The complicated transfers of buffaloes at ceremonies undoubtedly play a large part in the impoverishment of many Todas, as well as the slaughter of buffaloes at funerals, and certain ceremonies involving feasts complete the process. Under this system of traffic in the bazaar the Todas as a tribe are never free of debt. When the Toda Amelioration Scheme was initiated some years ago under the aegis of Government, it was considered that the first step to be taken was the paying off of the Todas' debts and this was done by Government. The Scheme was unsuccessful (see below) and the debts have grown again.

The Badagas, as has been said above, still continue their contributions to the Todas, while the Todas supply them with a small amount of produce and make various other small returns. The economic interchange between Kotas and Todas continues. This takes the form chiefly of a supply of tools and pots and the playing of music at funerals by the Kotas, and in return they require the carcasses and hides of the buffaloes slaughtered at funerals, a certain amount of ghee, and occasionally other articles. In both cases it seems probable that the Todas are the gainers in the total of transactions. The continuance of these interchanges
